

## Specification

### Digital Input & Relay Output Module

|                          |                             |  |
|--------------------------|-----------------------------|--|
|                          | <b>Input Channel</b>        | 4 ( Differential )   |
|                          | <b>Input Type</b>           | Isolated differential digital input  |
| <b>DI</b>                | <b>Input Voltage</b>        | 30 Vdc Max   |
|                          | <b>ON State</b>             | Input voltage > 3.5V   |
|                          | <b>OFF State</b>            | Input voltage < 1V   |
|                          | <b>Input Impedance</b>      | 3K Ohms  |
|                          | <b>Isolation Voltage</b>    | 3750 Vrms  |
|                          | <b>Output Channel</b>       | 4  |
|                          | <b>Relay Type</b>           | Form C   |
| <b>Relay Output</b>      | <b>Contact Rating</b>       | 0.6A @125VAC<br>2A @30VDC  |
|                          | <b>Operate/Release Time</b> | 3mS/2mS  |
|                          | <b>Operation Life</b>       | Mechanical: 10 <sup>8</sup> Min<br>Electrical: 5*10 <sup>5</sup> Min           |
| <b>LED Display</b>       |                             | 1 LED as Power indicator<br>4 LEDs as DI indicators<br>4 LEDs as DO indicators |
| <b>Power Consumption</b> |                             | Typical: 0.5W<br>Maximum : 1.0W  |

### I-87063 Wire Connection

### I-87063 Wire Connection Type

| Input Type     | ON State<br>LED ON<br>Readback as 1 | OFF State<br>LED OFF<br>Readback as 0 |
|----------------|-------------------------------------|---------------------------------------|
| Relay Contact  |                                     |                                       |
| TTL/CMOS Logic |                                     |                                       |
| Open Collector |                                     |                                       |
| Output Type    | ON State<br>LED ON<br>Readback as 1 | OFF State<br>LED OFF<br>Readback as 0 |
| Relay Contact  |                                     |                                       |

### I-87063 Internal I/O Structure
