

## Rugged Power + Smart Connectivity

A vehicle-powered USB-C hub built to thrive in fleet vehicles and forklifts

**Power your tech. Connect your tools. Simplify your setup.**

**NO POWER BRICK. NO MESS. JUST MISSION-READY PERFORMANCE.**

Designed for the demands of fleet vehicles and industrial environments, KeyMobile™ is a 6-in-1 USB-C hub that combines robust connectivity with a powerful onboard charging solution — all in one compact, ruggedized unit.

Tablets and laptops are fast becoming the operational core of mobile and material handling teams — but powering them reliably while connecting printers, routers, scales, and scanners in the field isn't easy. KeyMobile solves that.

It's fully powered by your vehicle (no external power brick required), delivers up to 100W of USB-C PD, and features shock and vibration tested durability that meets MIL-STD-810 standards. In a truck or on a forklift, it's built to perform in harsh conditions, extreme temps, and high-vibration environments.

Plus, with integrated serial port support for forklift scales and thumb-screw-secured USB-C connections, you get rock-solid performance wherever the job takes you.

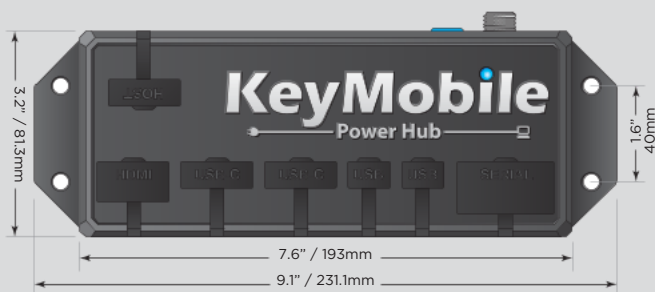

### Power & Durability:

- ✓ Vehicle powered: 9–36V DC Delivers
- ✓ 100W Power Delivery (PD) to charge tablets/laptops
- ✓ Shock/vibration rated to MIL-STD-810
- ✓ Operating temp: -10°C to 60°C
- FCC & CE certified

### Rugged Features:

- ✓ Rubber portflaps for water/dust protection
- ✓ Screw-on power cable and USB-C host cable included

### Connectivity Ports:

- ✓ 2x USB-C (with thumb screw support)
- ✓ 2x USB-A
- ✓ 1x HDMI
- ✓ 1x DB9 Serial (Pin-9 supplies)
- ✓ 900 mA @ 5VDC for powered devices like forklift scales)
